

## SELFIE TIPS

- Experiment with angles.
- Look for great lighting. Outdoors in natural light is usually best. Make sure your light source is in front of you. If it's behind you, you'll be cast in shadow and look darker.
- Smile, but control it. A nice small, natural smile is best.
- A camera timer is extremely helpful.
- Try the "shelfie", by putting your phone in a clear cup on a shelf and use a timer.
- Don't stand straight towards the camera. Position your body and bend a knee and arm. This always helps your posture.
- Try not to block your face.
- All selfies don't require hair and makeup.
- Crop out as much background as possible.
- Take several selfies and pick out the best one.
- Try out different camera apps like GoCam, Selfshot, Facetune, or Echo Look.
- If you have one, use your selfie stick.
- Don't overthink.
- Have fun with it!
